SCHEDULE — CONVENTION: ANNEX ON CHEMICALS
As certified on 6 November 2012

REPUBLIC OF NAURU

Chemical Weapons Convention Act 2012

Act No. 20 of 2012

An Act to give effect to the Chemical Weapons Convention, and for related purposes

Certified on 6 November 2012

Enacted by the Parliament of Nauru as follows:

PART 1 – PRELIMINARY MATTERS

1 Short title

This Act may be cited as the Chemical Weapons Convention Act 2012.

2 Commencement

This Act commences on certification.

3 Extraterritorial application of offences

A person commits an offence under this Act if:

(a) the conduct constituting the offence occurred wholly or partly in:

   (i) Nauru; or

As certified on 6 November 2012
(ii) a place that is under the control of Nauru; or

(b) a result of the conduct constituting the offence occurred wholly or partly in:

(i) Nauru; or

(ii) a place that is under the control of Nauru; or

(c) the person is a Nauruan citizen, whether or not the conduct constituting the offence, or a result of the conduct, occurred wholly or partly in Nauru.

4 Act binds Republic

This Act binds the Republic.

PART 2 – INTERPRETATION

5 Definitions

In this Act:

‘Authority’ means the Chemical Weapons Authority established under Part 3;

‘consumption’ of a chemical means its conversion into another chemical via a chemical reaction;

‘Convention’ means the Convention on the Prohibition of the Development, Production, Stockpiling and Use of Chemical Weapons and on their Destruction (done at Paris on 13 January 1993) and includes:

(a) the Annexes to the Convention; and

(b) any amendments to the Convention or the Annexes to the Convention that are binding on Nauru from time to time;

‘discrete organic chemical’ means a chemical belonging to the class of chemical compounds consisting of all compounds of carbon except for its oxides, sulfides and metal carbonates unless:

(a) it is an oligomer or polymer, whether or not it contains phosphorus, sulphur or fluorine; or
(b) it contains only carbon and metal;

‘international inspection’ means an inspection or visit carried out by an international inspector under the Convention;

‘international inspector’ means an inspector designated under Part II, Section A of the Convention;

‘Organisation’ means the Organization for the Prohibition of Chemical Weapons established under the Convention;

‘permitted purpose’ means:

(a) for a Schedule 1 chemical – a research, medical or pharmaceutical purpose or a purpose directly related to protection against toxic chemicals and chemical weapons; or

(b) for a Schedule 2 or 3 chemical or any other toxic chemical or precursor:

(i) an industrial, agricultural, research, medical, pharmaceutical purpose or other peaceful purpose; or

(ii) a purpose directly related to protection against toxic chemicals and chemical weapons; or

(iii) a military purpose not connected with the use of chemical weapons and not dependent on the use of the toxic properties of chemicals as a method of warfare; or

(iv) law enforcement, including domestic riot control;

‘processing’ of a chemical means a physical process, such as formulation, extraction and purification, in which a chemical is not converted into another chemical;

‘production’ of a chemical means its formation through chemical reaction;

‘Schedule 1 chemical’ means a chemical listed in Schedule 1 of the Annex to the Convention on Chemicals (see the Schedule);

‘Schedule 2 chemical’ means a chemical listed in Schedule 2 of the Annex to the Convention on Chemicals (see the Schedule);
‘Schedule 3 chemical’ means a chemical listed in Schedule 3 of the Annex to the Convention on Chemicals (see the Schedule).

6 Other terms defined in Convention

Unless the context otherwise requires, a term that is not defined in this Act but is defined in the Convention has the meaning given to the term in the Convention.

PART 3 – CHEMICAL WEAPONS AUTHORITY

7 Establishment of Authority

(1) The Chemical Weapons Authority is established.

(2) The Authority consists of the Head of Department.

8 Functions of Authority

(1) The Authority has the following functions:

(a) to be the national focal point for effective liaison with the Organisation and other States Parties to the Convention;

(b) to administer this Act;

(c) to supervise the implementation of the Convention in Nauru.

(2) The Authority must, in performing its functions, have regard to Nauru’s obligations under the Convention and must not act in a manner that is inconsistent with those obligations.

9 Delegation

The Authority may, with the written consent of the Minister, delegate any of its functions or powers to another person.
PART 4 – CHEMICAL WEAPONS

10 Chemical weapon – development, production, acquisition and possession

A person commits an offence if the person develops, produces, acquires or possesses a chemical weapon.

Maximum penalty: $1,000,000 or imprisonment for life

11 Chemical weapon – transportation and transfer

A person commits an offence if the person:

(a) engages in conduct; and

(b) the conduct results in the transportation or transfer, whether directly or indirectly, of a chemical weapon to another person; and

(c) the person knows, or is reckless as to whether, the conduct will have that result.

Maximum penalty: $1,000,000 or imprisonment for life

12 Chemical weapon and riot control agents – use

A person commits an offence if the person uses:

(a) a chemical weapon in any way; or

(b) a riot control agent as a method of warfare.

Maximum penalty: $1,000,000 or imprisonment for life

13 Chemical weapon – military preparations

A person commits an offence if the person engages in military preparations to use a chemical weapon.

Maximum penalty: $1,000,000 or imprisonment for life
14 Chemical weapon – forfeiture

(1) A chemical weapon found in Nauru or a place under the control of Nauru:

(a) is forfeited to the Republic; and

(b) may be seized without warrant by a police officer.

(2) The Authority must:

(a) store and dispose of the weapon in accordance with the Convention; and

(b) report the seizure of the weapon to the Organisation.

(3) A chemical used in the development or production of a chemical weapon in Nauru or a place under the control of Nauru:

(a) is forfeited to the Republic; and

(b) may be seized without warrant by a police officer.

PART 5 – SCHEDULED AND DISCRETE ORGANIC CHEMICALS

Division 1 – Schedule 1 chemicals

15 Schedule 1 chemical – Nauru or territory of another State party to Convention

(1) A person must not, without the written consent of the Authority, produce, acquire, possess, transport or use a Schedule 1 chemical in Nauru or the territory of another State party to the Convention.

Maximum penalty: $100,000 or imprisonment for 1 year.

(2) A person must not, without the written consent of the Authority, export or import a Schedule 1 chemical to or from the territory of another State party to the Convention.

Maximum penalty: $100,000 or imprisonment for 1 year.
(3) An application for consent must:

(a) be made in the manner and form required by the Authority; and

(b) be accompanied by the fee fixed by the Regulations.

(4) Consent may only be given if:

(a) the activity for which consent is sought is a permitted purpose; and

(b) the type and quantity of the chemical is strictly limited to those that can be justified for that purpose; and

(c) the aggregate amount of the chemicals at any given time possessed for the purpose will be equal to or less than 1 tonne; and

(d) the aggregate amount acquired for the purpose in any year will be equal to or less than 1 tonne; and

(e) in the case of production, the facility complies with the requirements set out in the Convention.

(5) The Authority may, by instrument in writing, impose conditions on its consent.

(6) Without limiting the conditions that may be imposed:

(a) conditions of a consent to produce a Schedule 1 chemical must include conditions relating to the facility at which the chemical is to be produced, to inspection of that facility and to verification activities conducted in connection with the facility as required by the Convention; and

(b) conditions must include requirements for returns to be provided to the Authority to enable the Authority to fulfil its reporting obligations under the Convention; and

(c) conditions must require compliance with the Convention as if the holder were a State party to the Convention, subject to any modifications specified in the conditions.

(7) The Authority may, by notice in writing to the holder of a consent, vary, revoke or impose further conditions on its consent.
(8) The Authority may, by notice in writing to the holder, withdraw its consent.

(9) A person to whom consent is given by the Authority must not contravene the conditions of the consent.

Maximum penalty: $100,000 or imprisonment for 1 year.

16 Schedule 1 chemicals – prohibitions in territory of State not party to Convention

(1) A person must not produce, acquire, possess, transport or use a Schedule 1 chemical in the territory of a State not party to the Convention.

Maximum penalty: $100,000 or imprisonment for 1 year.

(2) A person must not import or export a Schedule 1 chemical to or from the territory of a State not party to the Convention.

Maximum penalty: $100,000 or imprisonment for 1 year.

Division 2 – Schedule 2 chemicals

17 Schedule 2 chemical – production, processing or consumption

(1) A person must not produce, process or consume a Schedule 2 chemical other than for a permitted purpose.

Maximum penalty: $50,000.

(2) A person has a reporting obligation under this section for a calendar year if the person operates a facility at which a declared Schedule 2 chemical is produced, processed or consumed and the Schedule 2 threshold for the chemical is exceeded in that year or it is anticipated that it will be exceeded in that year.

(3) A declared Schedule 2 chemical is a Schedule 2 chemical in a concentration above the threshold fixed by Guidelines under the Convention.

(4) The Schedule 2 threshold is exceeded for a declared Schedule 2 chemical in a calendar year if more than the
following amount of the chemical is produced, processed or consumed at the facility during the year:

(a) for a chemical designated “*” in Schedule 2, Part A – 1 kilogram;

(b) for any other chemical listed in Schedule 2, Part A – 100 kilograms; or

(c) for a chemical listed in Schedule 2, Part B – 1 tonne.

Note for subsection (4)

The amounts refer to the weight of the Schedule 2 chemical contained in a mixture and not to the weight of the mixture itself.

(5) A person who has a reporting obligation under this section must, not later than 30 days after the end of a calendar year in which the Schedule 2 threshold for a declared Schedule 2 chemical is exceeded, provide the Authority with the following information in the manner and form required by the Authority:

(a) the name of the facility;

(b) the name and contact details of the operator of the facility;

(c) the precise location of the facility, including its address;

(d) the number of plants within the facility for which information must be provided under Division 3 (Schedule 3 chemicals);

(e) for each plant within the facility that is involved in the production, processing or consumption of a declared Schedule 2 chemical:

(i) the name of the plant;

(ii) the name and contact details of the operator of the plant;

(iii) its precise location within the facility, including the specific building or structure number, if any;

(iv) the main activities carried on at the plant;

(v) the declared Schedule 2 chemical;

(vi) whether the plant:
(A) produced, processed, or consumed the chemical; and

(B) was dedicated to such activities or was multi-purpose; and

(C) performed other activities with regard to the chemical, including a specification of that other activity (eg storage); and

(vii) the production capacity of the plant for the chemical and the method used to calculate that production capacity;

(f) for each declared Schedule 2 chemical:

(i) the chemical name, common or trade name used by the facility, structural formula, and Chemical Abstracts Service registry number, if assigned; and

(ii) the total amount produced, processed, consumed, imported and exported through the facility in the calendar year, expressed in kilograms or in tonnes;

(iii) the purpose for which the chemical was produced, processed or consumed, classified as follows:

(A) processing and consumption on site with a specification of the type of product that resulted from the processing or consumption;

(B) sale or transfer within Nauru or a territory of a State party to the Convention, with a specification whether it was sold or transferred to another industry, trader or another destination and, if known, the final type of product that resulted from the production, processing or consumption;

(C) direct export, with a specification of the countries involved; or

(D) other, including a specification of the other purposes.

Maximum penalty: $50,000.

(6) A person who has a reporting obligation under this section must, not later than 90 days before the beginning of a calendar year in which it is anticipated that the Schedule 2 threshold will be
exceeded, provide the Authority with the following information in the manner and form required by the Authority:

(a)  the name of the facility;

(b)  the name and contact details of the operator of the facility;

(c)  the precise location of the facility, including its address;

(d)  the number of plants within the facility for which information must be provided under Division 3 (Schedule 3 chemicals);

(e)  for each plant within the facility that is involved in the production, processing or consumption of a declared Schedule 2 chemical:

(i)  the name of the plant;

(ii)  the name and contact details of the operator of the plant;

(iii) its precise location within the facility, including the specific building or structure number, if any;

(iv)  the main activities carried on at the plant;

(v)   the declared Schedule 2 chemical;

(vi)  whether it is anticipated that the plant:

(A)  will produce, process, or consume the chemical; and

(B)  will be dedicated to such activities or will be multi-purpose; and

(C)  will perform other activities with regard to the chemical, including a specification of that other activity (eg storage); and

(vii) the anticipated production capacity of the plant for the chemical and the method used to calculate that production capacity;

(f)   for each declared Schedule 2 chemical:

(i)  the chemical name, common or trade name used by the facility, structural formula, and Chemical Abstracts Service registry number, if assigned; and
(ii) the total amount anticipated to be produced, processed, consumed, imported and exported through the facility in the calendar year, expressed in kilograms or in tonnes;

(iii) the purpose for which it is anticipated the chemical will be produced, processed or consumed, classified as follows:

(A) processing and consumption on site with a specification of the type of product to result from the processing or consumption;

(B) sale or transfer within Nauru or a territory of a State party to the Convention, with a specification whether it is to be sold or transferred to another industry, trader or another destination and, if known, the final type of product to result from the production, processing or consumption;

(C) direct export, with a specification of the countries involved; or

(D) other, including a specification of the other purposes.

Maximum penalty: $50,000.

18 Schedule 2 chemical – prohibited import or export

A person must not import or export a Schedule 2 chemical to or from the territory of a State not party to the Convention.

Maximum penalty: $50,000.

19 Schedule 2 chemical – import or export

A person who imports or exports a Schedule 2 chemical to or from Nauru or the territory of a State party to the Convention during a calendar year must provide the Authority, within 30 days after the end of the year, with the following information in the manner and form required by the Authority:

(a) the name and contact details of the person;

(b) the types and quantities (expressed in kilograms or tonnes) of each Schedule 2 chemical imported and
exported and the country from which it was imported or
the country of final destination.

Maximum penalty: $50,000.

Division 3 – Schedule 3 chemicals

20 Schedule 3 chemical – production

(1) A person must not produce a Schedule 3 chemical other than
for a permitted purpose.

Maximum penalty: $50,000.

(2) A person has a reporting obligation under this section for a
calendar year if the person operates a facility at which a
declared Schedule 3 chemical is produced and the Schedule 3
threshold is exceeded in that year or it is anticipated that it will
be exceeded in that year.

(3) A declared Schedule 3 chemical is a Schedule 3 chemical in a
concentration above the threshold fixed by Guidelines under the
Convention.

(4) The Schedule 3 threshold is exceeded in a calendar year if:

(a) more than 30 tonnes of a declared Schedule 3 chemical is
produced at the facility during the year; or

(b) it is anticipated that more than 30 tonnes of a declared
Schedule 3 chemical will be produced at the facility during
the year.

(5) A person who has a reporting obligation under this section must,
not later than 30 days after the end of a calendar year in which
the Schedule 3 threshold is exceeded, provide the Authority with
the following information in the manner and form required by the
Authority:

(a) the name of the facility;

(b) the name and contact details of the operator of the facility;

(c) the precise location of the facility, including its address;
(d) the number of plants within the facility for which information must be provided under Division 2 (Schedule 2 chemicals);

(e) for each Schedule 3 chemical:
   (i) the chemical name, common or trade name used by the facility, structural formula, and Chemical Abstracts Service registry number, if assigned; and
   (ii) the approximate amount of production of the chemical during the year, expressed in the ranges: 30 to less than 200 tonnes, 200 to less than 1,000 tonnes, 1,000 to less than 10,000 tonnes, 10,000 to less than 100,000 tonnes, and 100,000 tonnes or more; and
   (iii) the purposes for which the chemical was produced.

Maximum penalty: $50,000.

(6) A person who has a reporting obligation under this section must, not later than 90 days before the beginning of a calendar year in which it is anticipated that the Schedule 3 threshold will be exceeded, provide the Authority with the following information in the manner and form required by the Authority:

(a) the name of the facility;

(b) the name and contact details of the operator of the facility;

(c) the precise location of the facility, including its address;

(d) the number of plants within the facility for which information must be provided under Division 2 (Schedule 2 chemicals);

(e) for each declared Schedule 3 chemical:
   (i) the chemical name, common or trade name used by the facility, structural formula, and Chemical Abstracts Service registry number, if assigned; and
   (ii) the approximate amount of production of the chemical anticipated for the next calendar year, expressed in the ranges: 30 to less than 200 tonnes, 200 to less than 1,000 tonnes, 1,000 to less than 10,000 tonnes, 10,000 to less than 100,000 tonnes, and 100,000 tonnes or more; and
(iii) the purposes for which the chemical will be produced.

Maximum penalty: $50,000.

21 Schedule 3 chemical – import or export

A person who imports or exports a Schedule 3 chemical to or from Nauru or the territory of a State party to the Convention during a calendar year must provide the Authority, within 30 days after the end of the year, with the following information in the manner and form required by the Authority:

(a) the name and contact details of the person;

(b) the types and quantities (expressed in kilograms or tonnes) of each Schedule 3 chemical imported and exported and the country from which it was imported or the country of final destination.

Maximum penalty: $50,000.

22 Schedule 3 chemical – export to territory of State not party to Convention

A person must not export a Schedule 3 chemical to a territory of a State not party to the Convention unless the person:

(a) obtains from the intended recipient of the chemical, before it leaves Nauru, a certificate stating that:

   (i) the chemicals will only be used for purposes not prohibited under the Convention; and

   (ii) the chemicals will not be re-transferred; and

   (iii) the types and quantities (expressed in kilograms or tonnes) of chemicals to be exported; and

   (iv) the end uses of the chemicals; and

   (v) the names and addresses of the end users; and

(b) takes any other measures that are reasonable in the circumstances to ensure that the chemical is only used for a permitted purpose.

Maximum penalty: $50,000.
Division 4 – Discrete organic chemicals

23 Discrete organic chemicals – production by synthesis

(1) A person must not produce a discrete organic chemical other than for a permitted purpose.

Maximum penalty: $50,000.

(2) A person has a reporting obligation under this section for a calendar year if the person operates a chemical production facility and during that year:

(a) more than 200 tonnes of discrete organic chemicals is produced by synthesis at the facility; or

(b) more than 30 tonnes of a discrete organic chemical containing the elements phosphorus, sulphur or fluorine is produced by synthesis at the facility;

but not if the facility exclusively produced explosives or hydrocarbons during that year.

(3) A person who has a reporting obligation under this section for a calendar year must, not later than 30 days after the end of the year, provide the Authority with the following information:

(a) the name of the facility;

(b) the name and contact details of the operator of the facility;

(c) the precise location of the facility, including its address;

(d) the main activities carried on at the facility during the calendar year;

(e) the approximate number of plants producing the chemicals specified in subsection (2) at the facility;

(f) in the case of a facility at which more than 200 tonnes of discrete organic chemicals is produced by synthesis – the approximate aggregate amount of production of the chemicals during the calendar year expressed in the ranges: under 1,000 tonnes, 1,000 to less than 10,000 tonnes and 10,000 tonnes or more;
(g) in the case of a facility at which more than 30 tonnes of a discrete organic chemical containing the elements phosphorus, sulphur or fluorine is produced by synthesis – the approximate aggregate amount of production of PSF-chemicals produced by each PSF-plant during the calendar year expressed in the ranges: under 200 tonnes, 200 to less than 1,000 tonnes, 1,000 to less than 10,000 tonnes and 10,000 tonnes or more.

Maximum penalty: $50,000.

Division 5 – Information

24 Authority may obtain information for declarations

(1) If the Authority is of the opinion that a person is capable of giving information or providing documents relevant to:

(a) a declaration required to be given by the Republic to the Organisation under the Convention; or

(b) the enforcement of this Act;

the Authority may, by notice in writing given to the person, require the person to give the Authority specified information or documents, or information or documents of a specified kind, in the manner and within the period specified in the notice.

(2) The Authority may require the information to be verified by statutory declaration or on oath (and the information will not be taken to have been provided until so verified).

(3) A person must not, without reasonable excuse, fail to comply with a notice given to the person under subsection (1).

Maximum penalty: $25,000.

PART 6 – INTERNATIONAL INSPECTIONS

25 Places and things subject to inspection

A place or thing is subject to an international inspection if the inspection is permitted under the Convention.
Powers, privileges and immunities of inspectors

An international inspector performing his or her duties under the Convention in Nauru or a place controlled by Nauru has all the powers, privileges and immunities specified in the Convention.

Escort

The Authority may authorise a person in writing to accompany an international inspector conducting an international inspection in order to facilitate the inspection.

Obstruction of inspection activities

A person in charge of a place or thing that is subject to an international inspection must not hinder or obstruct an international inspector carrying out inspection activities permitted or required under the Convention.

Maximum penalty: $25,000.

PART 7 – MISCELLANEOUS MATTERS

False or misleading information

A person must not make a statement that is false or misleading in a material particular (whether by reason of the inclusion or omission of any particular) in information provided under this Act.

Maximum penalty: $10,000.

Liability of directors

(1) If a body corporate commits an offence against this Act, each director of the body corporate is guilty of an offence and liable to the same penalty as is fixed for the principal offence.

(2) A director of a body corporate may be prosecuted and convicted of an offence under this section whether or not the body corporate has been prosecuted or convicted of the offence committed by the body corporate.
31 Confidentiality of information

(1) A person who has obtained information under this Act commits an offence if:

(a) the person engages in conduct; and
(b) the conduct results in the disclosure of the information to another person; and
(c) the person knows, or is reckless about whether, the person’s conduct will result in the disclosure.

Maximum penalty: $25,000.

(2) However, a person does not commit an offence under subsection (1) if the disclosure was made for the purpose of carrying out functions for the administration of this Act.

32 Evidentiary presumption

In proceedings for an offence against this Act, an apparently genuine document purporting to be a certificate signed by the Authority certifying a matter relating to a consent under this Act is, in the absence of proof to the contrary, proof of the matters so certified.

33 Regulations

(1) Cabinet may make regulations under this Act.

(2) The regulations may:

(a) be of general application or vary in their application according to prescribed factors; and
(b) give the Minister or the Authority discretion to decide a matter; and
(c) exempt a person, conditionally or unconditionally, from the application of a provision of this Act.
SCHEDULE — CONVENTION: ANNEX ON CHEMICALS

Extract from The Convention on the Prohibition of the Development, Production, Stockpiling and Use of Chemical Weapons and on their Destruction

ANNEX ON CHEMICALS

A. GUIDELINES FOR SCHEDULES OF CHEMICALS

Guidelines for Schedule 1
1. The following criteria shall be taken into account in considering whether a toxic chemical or precursor should be included in Schedule 1:
   (a) it has been developed, produced, stockpiled or used as a chemical weapon as defined in Article II;
   (b) it poses otherwise a high risk to the object and purpose of this Convention by virtue of its high potential for use in activities prohibited under this Convention because one or more of the following conditions are met:
      (i) it possesses a chemical structure closely related to that of other toxic chemicals listed in Schedule 1, and has, or can be expected to have, comparable properties;
      (ii) it possesses such lethal or incapacitating toxicity as well as other properties that would enable it to be used as a chemical weapon;
      (iii) it may be used as a precursor in the final single technological stage of production of a toxic chemical listed in Schedule 1, regardless of whether this stage takes place in facilities, in munitions or elsewhere;
   (c) it has little or no use for purposes not prohibited under this Convention.

Guidelines for Schedule 2
2. The following criteria shall be taken into account in considering whether a toxic chemical not listed in Schedule 1 or a precursor to a Schedule 1 chemical or to a chemical listed in Schedule 2, part A, should be included in Schedule 2:
   (a) it poses a significant risk to the object and purpose of this Convention because it possesses such lethal or incapacitating toxicity as well as other properties that could enable it to be used as a chemical weapon;
(b) it may be used as a precursor in one of the chemical reactions at
the final stage of formation of a chemical listed in Schedule 1 or
Schedule 2, part A;

(c) it poses a significant risk to the object and purpose of this
Convention by virtue of its importance in the production of a
chemical listed in Schedule 1 or Schedule 2, part A;

(d) it is not produced in large commercial quantities for purposes not
prohibited under this Convention.

Guidelines for Schedule 3

3. The following criteria shall be taken into account in considering
whether a toxic chemical or precursor, not listed in other Schedules,
should be included in Schedule 3:

(a) it has been produced, stockpiled or used as a chemical weapon;

(b) it poses otherwise a risk to the object and purpose of this
Convention because it possesses such lethal or incapacitating
toxicity as well as other properties that might enable it to be used
as a chemical weapon;

(c) it poses a risk to the object and purpose of this Convention by
virtue of its importance in the production of one or more
chemicals listed in Schedule 1 or Schedule 2, part B;

(d) it may be produced in large commercial quantities for purposes not
prohibited under this Convention.

B. SCHEDULES OF CHEMICALS

The following Schedules list toxic chemicals and their precursors. For
the purpose of implementing this Convention, these Schedules
identify chemicals for the application of verification measures
according to the provisions of the Verification Annex. Pursuant to
Article II, subparagraph 1(a), these Schedules do not constitute a
definition of chemical weapons.

(Whenever reference is made to groups of dialkylated chemicals,
followed by a list of alkyl groups in parentheses, all chemicals
possible by all possible combinations of alkyl groups listed in the
parentheses are considered as listed in the respective Schedule as
long as they are not explicitly exempted. A chemical marked “*” on
Schedule 2, part A, is subject to special thresholds for declaration and
verification, as specified in Part VII of the Verification Annex.)
### Schedule 1

**A. Toxic chemicals:**

1. **O-Alkyl (≤ C10, incl. cycloalkyl) alkyl**
   - (Me, Et, n-Pr or i-Pr)-phosphonofluoridates
   - e.g. Sarin: O-Isopropyl methylphosphonofluoridate (107-44-8)
   - Soman: O-Pinacolyl methylphosphonofluoridate (96-64-0)

2. **O-Alkyl (≤ C10, incl. cycloalkyl) N,N-dialkyl**
   - (Me, Et, n-Pr or i-Pr) phosphoramidocyanidates
   - e.g. Tabun: O-Ethyl N,N-dimethyl phosphoramidocyanidate (77-81-6)

3. **O-Alkyl (H or ≤ C10, incl. cycloalkyl) S-2-dialkyl**
   - (Me, Et, n-Pr or i-Pr)-aminoethyl alkyl phosphonothiolates and corresponding alkylated or protonated salts
   - e.g. VX: O-Ethyl S-2-diisopropylaminoethyl methyl phosphonothiolate (50782-69-9)

4. **Sulfur mustards:**
   - 2-Chloroethylchloromethylsulfide (2625-76-5)
   - Mustard gas: Bis(2-chloroethyl) sulfide (505-60-2)
   - Bis(2-chloroethylthio)methane (63869-13-6)
   - Sesquimustard: 1,2-Bis(2-chloroethylthio) ethane (3563-36-8)
   - 1,3-Bis(2-chloroethylthio)-n-propane (63905-10-2)
   - 1,4-Bis(2-chloroethylthio)-n-butane (142868-93-7)
   - 1,5-Bis(2-chloroethylthio)-n-pentane (142868-94-8)
   - Bis(2-chloroethylthiomethyl)ether (63918-90-1)
   - O-Mustard: Bis(2-chloroethylthioethyl) ether (63918-89-8)

5. **Lewisites:**
   - Lewisite 1: 2-Chlorovinyl dichloroarsine (541-25-3)
   - Lewisite 2: Bis(2-chlorovinyl)chloroarsine (40334-69-8)
   - Lewisite 3: Tris(2-chlorovinyl)arsine (40334-70-1)

6. **Nitrogen mustards:**
   - HN1: Bis(2-chloroethyl)ethylamine (538-07-8)
   - HN2: Bis(2-chloroethyl)methylamine (51-75-2)
   - HN3: Tris(2-chloroethyl)amine (555-77-1)

7. **Saxitoxin** (35523-89-8)

8. **Ricin** (9009-86-3)

**B. Precursors:**

9. **Alkyl (Me, Et, n-Pr or i-Pr) phosphonyldifluorides**
e.g. DF: Methylphosphonyldifluoride (676-99-3)

(10) O-Alkyl (H or \( \leq \) C10, incl. cycloalkyl) O-2-dialkyl (Me, Et, n-Pr or i-Pr)-aminoethyl alkyl (Me, Et, N-Pr or i-Pr) phosphonites and corresponding alkylated or protonated salts
e.g. QL: O-Ethyl O-2-diisopropylaminoethyl methylphosphonite (57856-11-8)

(11) Chlorosari: O-Isopropyl methylphosphonochloridate (1445-76-7)
(12) Chlorosoman: O-Pinacolyl methylphosphonochloridate (7040-57-5)

Schedule 2

A. Toxic chemicals:
(1) Amiton: O,O-Diethyl S-[2-(diethylamino)ethyl] phosphorothiolate and corresponding alkylated or protonated salts (78-53-5)

(2) PFIB1,1,3,3,3-Pentafluoro-2-(trifluoromethyl)-1-propene (382-21-8)

(3) BZ: 3-Quinuclidinyl benzilate (*) (6581-06-2)

B. Precursors:
(4) Chemicals, except for those listed in Schedule 1, containing a phosphorus atom to which is bonded one methyl, ethyl or propyl (normal or iso) group but not further carbon atoms,
e.g. Methylphosphonyl dichloride (676-97-1)
    Dimethyl methylphosphonate (756-79-6)
Exemption: Fonofos: O-Ethyl S-phenyl ethylphosphonothiolothionate (944-22-9)

(5) N,N-Dialkyl (Me, Et, n-Pr or i-Pr) phosphoramidic dihalides

(6) Dialkyl (Me, Et, n-Pr or i-Pr) N,N-dialkyl (Me, Et, n-Pr or i-Pr)-phosphoramidates

(7) Arsenic trichloride (7784-34-1)

(8) 2,2-Diphenyl-2-hydroxyacetic acid (76-93-7)

(9) Quinuclidine-3-ol (1619-34-7)

(10) N,N-Dialkyl (Me, Et, n-Pr or i-Pr) aminoethyl-2-chlorides and corresponding protonated salts

(11) N,N-Dialkyl (Me, Et, n-Pr or i-Pr) aminoethane-2-ols and corresponding protonated salts
Exemptions:
    N,N-Dimethylaminoethanol and corresponding protonated salts (108-01-0)
    N,N-Diethylaminoethanol and corresponding protonated salts (100-37-8)

(12) N,N-Dialkyl (Me, Et, n-Pr or i-Pr) aminoethane-2-thiols and corresponding protonated salts
### Schedule 3

#### A. Toxic chemicals:
1. Phosgene: Carbonyl dichloride (75-44-5)
2. Cyanogen chloride (506-77-4)
3. Hydrogen cyanide (74-90-8)
4. Chloropicrin: Trichloronitromethane (76-06-2)

#### B. Precursors:
5. Phosphorus oxychloride (10025-87-3)
6. Phosphorus trichloride (7719-12-2)
7. Phosphorus pentachloride (10026-13-8)
8. Trimethyl phosphate (121-45-9)
9. Triethyl phosphate (122-52-1)
10. Dimethyl phosphate (868-85-9)
11. Diethyl phosphate (762-04-9)
12. Sulfur monochloride (10025-67-9)
13. Sulfur dichloride (10545-99-0)
14. Thionyl chloride (7719-09-7)
15. Ethydiethanolamine (139-87-7)
16. Methyl-diethanolamine (105-59-9)
17. Triethanolamine (102-71-6)
